Dahua Technology Partner Day 2019

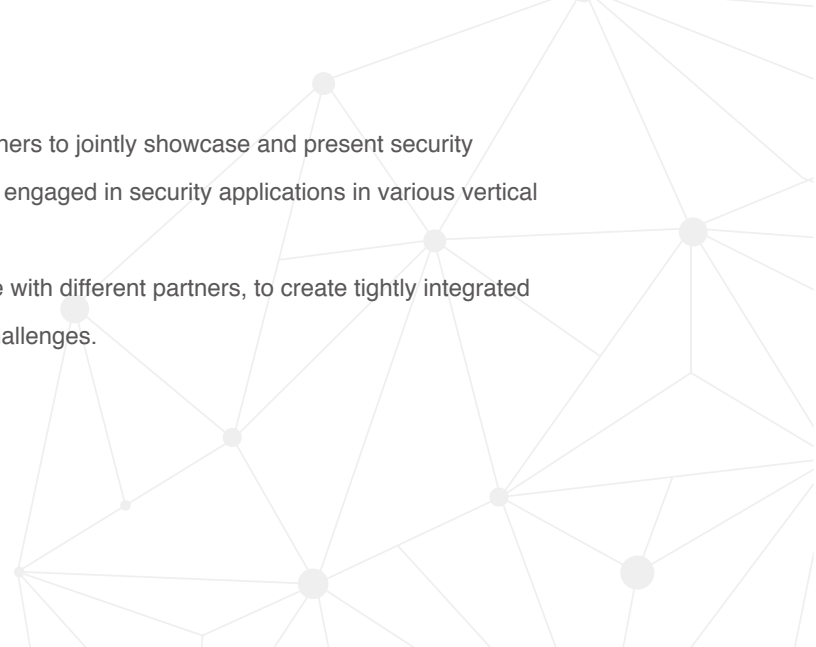

26th Sept. , 2019
Wanda Metropolitano,
Madrid, Spain

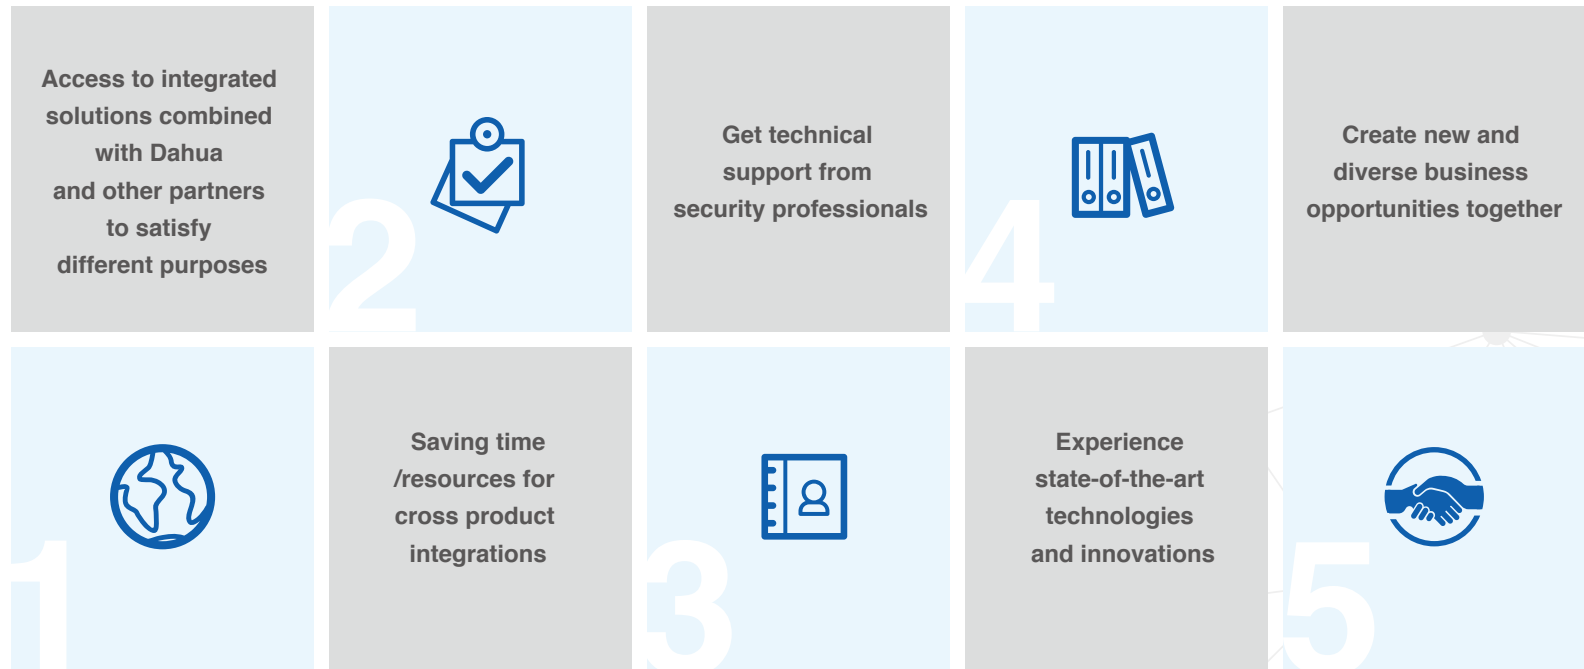

Create Smart Solutions Together

Dahua Technology Partner Day Spain will bring together 13 strategic technology partners to jointly showcase and present security innovations and end-to-end solutions, for System Integrators and End Users who are engaged in security applications in various vertical markets.

Dahua Technology advocates openness, by providing an open platform to collaborate with different partners, to create tightly integrated solutions for our customers with true value to address their technical and business challenges.

Top 5 Reasons to Attend Dahua Technology Partner Day 2019

Target Industries

Who's Exhibiting

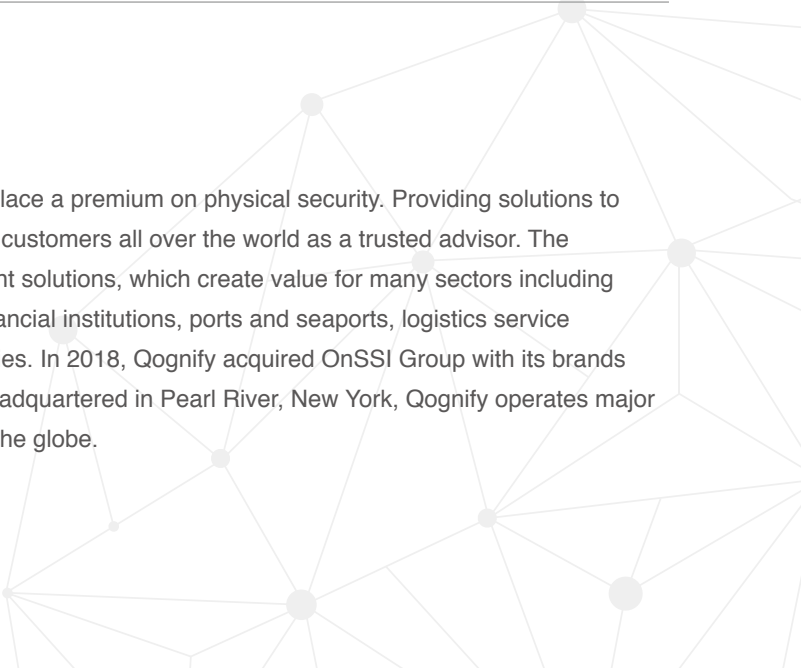

Seagate is the global leader in data storage solutions, developing amazing products that enable people and businesses around the world to create, share and preserve their most critical memories and business data.

Over the years the amount of information stored has grown from megabytes all the way to megabytes, confirming the need to successfully store and access huge amounts of data. As demand for storage technology grows the need for greater efficiency and more advanced capabilities continues to evolve.

Today data storage is more than just archiving; it's about providing ways to analyze information, understand patterns and behavior, to re-live experiences and memories. It's about harnessing stored information for growth and innovation. Seagate is building on its heritage of storage leadership to solve the challenge of getting more out of the living information that's produced everyday. What began with one storage innovation has morphed into many systems and solutions becoming faster, more reliable and expansive. No longer is it just about storing information; it is about accessing and interpreting information quickly, accurately and securely.

Qognify

Qognify helps safeguarding your world, focusing on the outcomes of customers, who place a premium on physical security. Providing solutions to mitigate risks, increase security and optimize operations, Qognify serves thousands of customers all over the world as a trusted advisor. The comprehensive portfolio of Qognify contains physical security and incident management solutions, which create value for many sectors including manufacturing companies, transportation authorities, retail chains, banks and other financial institutions, ports and seaports, logistics service providers, schools and universities, correctional facilities, critical infrastructures and cities. In 2018, Qognify acquired OnSSI Group with its brands OnSSI and SeeTec, forming a leading global player in the physical security market. Headquartered in Pearl River, New York, Qognify operates major development hubs in Germany and Israel as well as sales and support offices around the globe.

Founded in 1998, Milestone Systems is a global industry leader in open platform IP video management software. The XProtect platform delivers powerful surveillance that is easy to manage, reliable and proven in thousands of customer installations around the world. With support for the widest choice in network hardware and integration with other systems, XProtect provides best-in-class solutions to video enable organizations – managing risks, protecting people and assets, optimizing processes and reducing costs. Milestone software is sold through authorized and certified partners.

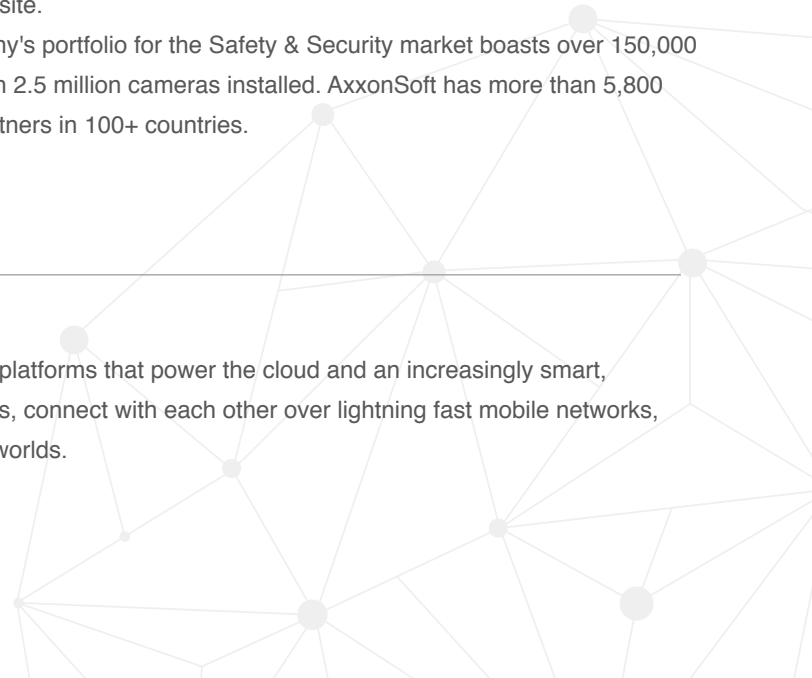

AxxonSoft is a leading developer of Video Management and Physical Security Information Management software. Since 2003, the company has been creating disruptive technologies that push the Safety & Security industry forward.

AxxonSoft's unique strengths are Smart Forensic Search in recorded video, TimeCompressor video synopsis technology, and customizable video analytics powered by Artificial Intelligence. To meet the needs of a particular facility, AxxonSoft AI learns to perform customer-specific tasks from video material obtained onsite.

The company's portfolio for the Safety & Security market boasts over 150,000 projects with 2.5 million cameras installed. AxxonSoft has more than 5,800 certified partners in 100+ countries.

Intel is a world leader in the design and manufacturing of essential technologies and platforms that power the cloud and an increasingly smart, connected world. Our technologies unlock the power of data to ride in self driving cars, connect with each other over lightning fast mobile networks, have artificial intelligence improve many aspects of our lives, and experience virtual worlds.

ivideon

Ivideon is the leading cloud VMS with more than 1 000 000 users around the globe which was created by the progressive engineers at the junction of security and Internet services. Ivideon has wide opportunities to integrate with ISP and telecommunications operators. The company was founded in 2010 and by 2014 Ivideon Cloud Service was acknowledged as the best cloud solution on the B2B market. Ivideon easily manages projects of any complexity level from 1 to 1 000 000 cameras and allows to solve many issues concerning security, business and monitoring for both profit-making organizations and big state projects using remote access. Currently, cloud data centers of Ivideon are located in the USA, Europe, CIS and Asia that allows to serve clients worldwide with maximum quality and reliability.

The logo for A.I. Tech, featuring the letters "AI" in a blue square above the word "Tech" in a smaller font.

A.I. Tech

The Vision of the future. Now.

A.I.Tech is an Italian company designing and developing video-analytics solutions based on best-of-breed artificial intelligence and deep learning algorithms, able to automatically extract information of interests that can be used for both alarmistic and statistical purposes. Our products can be used in several vertical markets, such as retail and business intelligence; security and banking security; smart roads and traffic monitoring; smart hospital; smart cities, smart parking.

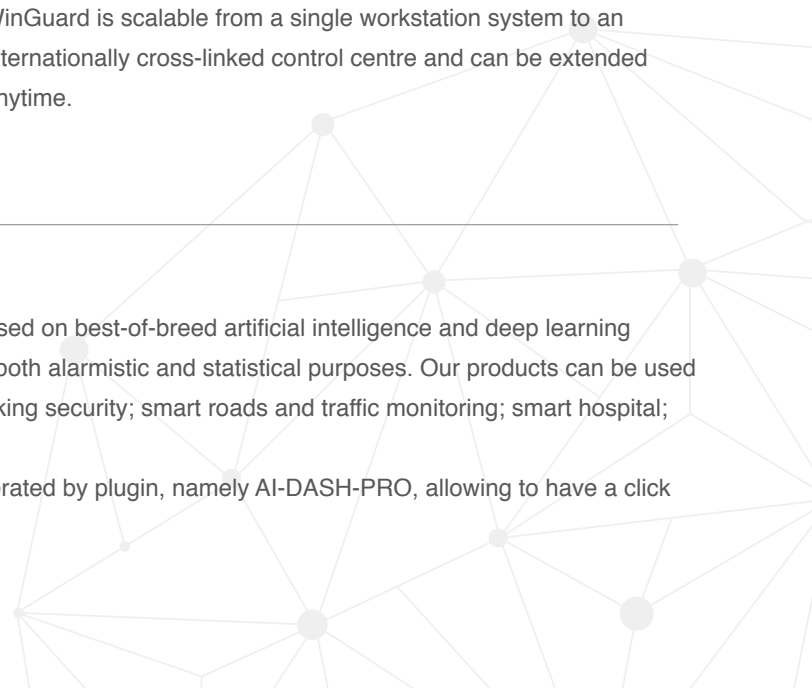

A.I.Tech also provides a way for collecting, aggregating and visualizing the data generated by plugin, namely AI-DASH-PRO, allowing to have a click away all data generated by your devices.

advancis

With over 1500 installations, WinGuard from Advancis is one of the market leading PSIM systems worldwide. It is an open platform used to integrate security, building automation, IT and communication systems.

WinGuard provides operators with an instant picture of full situational analysis for decision making and control of all systems as well as dynamic handling procedures for live security incidents. All actions, events and user entries are logged. Reports and evaluations can be generated, offering a quick overview of key figures.

WinGuard is scalable from a single workstation system to an internationally cross-linked control centre and can be extended anytime.

Herta is a world leader in the development of hi-tech facial recognition solutions. Based in Barcelona and with offices in Madrid, London, Los Angeles, Montevideo, Singapore and Dubai, the company offers fast, accurate, robust, end-customer oriented solutions for video surveillance, access control, and marketing requirements. International projects include safe-cities, airports, train and metro stations, prisons, banks, casinos, sports stadiums, shopping malls, police and forensic applications. Herta has partners in 50 countries and more than 150 certified integrators globally. Herta specializes in the analysis of crowded environments, making it possible to identify multiple subjects at the same time through IP cameras.

OPTEX®, the leading sensor manufacturer for over 40 years, provides high performance detection devices for security, safety, environmental and business applications. For security applications, OPTEX offers a multi-layered approach to intrusion detection that protects the perimeter, approach, building, roofs, critical assets and controlled areas. With sensing technologies ranging from passive and active infrared, microwave to LiDAR and fibre optics, OPTEX can provide the best combination of sensors to suit the requirements of any site and environment. Its LiDARs, IP outdoor PIRs and infrared beams are integrated with Dahua NVR's. All OPTEX sensors are unaffected by variable lighting and adverse weather conditions and provide extremely reliable outdoor detection to initiate events within a CCTV system.

Vaelsys are a pioneering business, basing our work on artificial intelligence algorithms that facilitate the exploitation of data contained in videos and images. Since our creation, entities such as Bancaja, La Caixa, Fundetec, Orange and the IE school of business have recognised the potential and innovation of the project. Ten years later, we have become one of the leading players in artificial intelligence solutions and computer vision.

Founded in 2012, Eagle Eye Networks, Inc. is the leading global provider of cloud-based video surveillance solutions addressing the needs of businesses, alarm companies, security integrators, and individuals. Eagle Eyes 100% cloud managed solutions provides cloud and on premise recording, bank level security and encryption, and broad analog and digital camera support all accessed via the web or mobile applications. Businesses of all sizes and types utilize Eagle Eye solutions for operational optimization and security. All Eagle Eye products benefit from Eagle Eyes developer friendly RESTful API platform and Big Data Video Framework™, which allow for indexing, search, retrieval, and analysis of live and archived video. Eagle Eyes open Video API has been widely adopted for integration in alarm monitoring, third party analytics, security dashboards, and point of sale system integrations. Eagle Eye sells its products through authorized global resellers and installation partners.

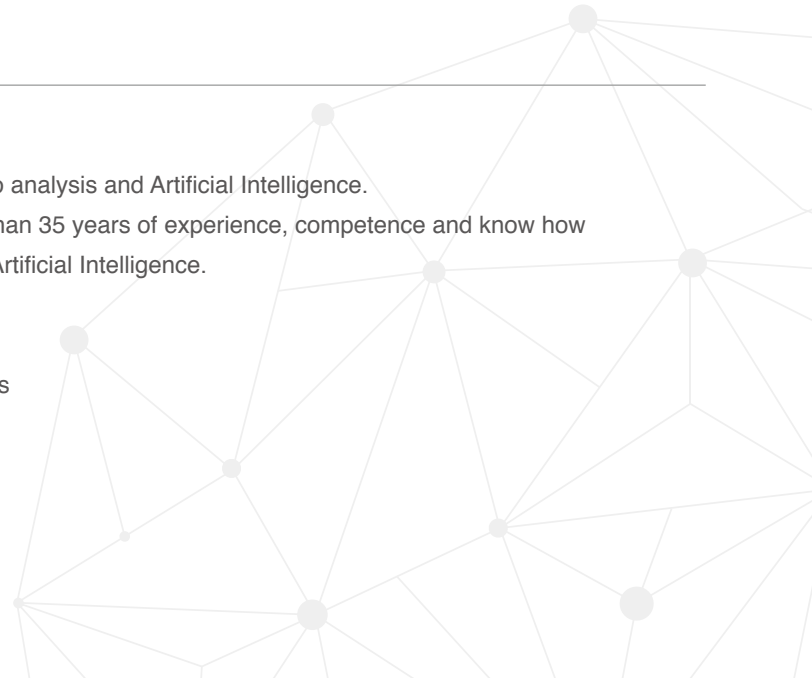

TECHNOAWARE
TECHNOLOGIES FOR AMBIENT INTELLIGENCE

TechnoAware researches and develops technologies, products and solutions for video analysis and Artificial Intelligence. Founded in 2003 from the University of Genoa's ISIP40 Research Group, with more than 35 years of experience, competence and know how TechnoAware's Team is one of the foremost experts worldwide in video analysis and Artificial Intelligence.

Why TechnoAware?

- The largest and most complete video analysis offer, with 27 functions available
- More than 35 years of competence, for the most reliable and performing solutions
- Presence worldwide
- Integrated with all the major market leading VMS brands
