

Full-color Camera

Colorful View Ever, Dark World Never

7*24 Colorful Monitoring

LED For Multi-Usages

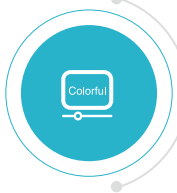

AI Keeps Safe All the Day

Broadcast-quality Audio

Features

7*24 Colorful Monitoring

Full-color series camera is able to present a 24/7 full color image that provides color details to identify people and objects accurately in low-light conditions. 24/7 color monitoring significantly increases probability of collecting valid human, vehicle, and event evidence.

LED For Multi-Usages

LED is not only a supplementary light for camera, but also can be used as street lamp in some suburbs to reduce construction cost.

AI Keeps Safe All the Day

Based on advanced AI algorithm which identify people or objects accurately in low-light conditions. Face Detection and Perimeter Protection are available at night to keep safe all the day.

Broadcast-quality Audio

Broadcast-quality audio provides clear audio information which can provide supplementary evidence for video surveillance (HAC Models).

Application Scenario

• Application-Urban Streets

• Application-Square

• Application-Park
