

Full-color Camera

Colorful View Ever, Dark World Never

7*24 Colorful Monitoring

Better Video Quality At Night

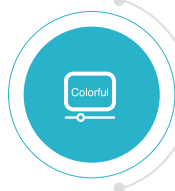

Good Invisibility Performance

Broadcast-quality Audio

Features

7*24 Colorful Monitoring

Full-color series camera is able to present a 24/7 full color image that provides color details to identify people and objects accurately in low-light conditions. 24/7 color monitoring significantly increases probability of collecting valid human, vehicle, and event evidence.

Better Video Quality At Night

The NI full-color camera has greatly improved the monitoring effect by cancelling the infrared lamp, which no longer reflects the rain at night and does not attract insects.

Good Invisibility Performance

NI full-color camera has no complementary light device, which will not emit light like infrared camera at night, to be a good silent security guard in darkness.

Broadcast-quality Audio

Broadcast-quality audio provides clear audio information which can provide supplementary evidence for video surveillance (HAC Models).

Application Scenario

• Application-Bar/Store

• Application-Parking Lot

• Application-Casino
