Face Detection

Features

24/7 surveillance in Full Color

Full-Color series camera is able to do 24/7 surveillance in the vivid image which can provide more details to identify people and objects accurately in low-light conditions, which significantly increases the probability of collecting valid human, vehicle, and event evidence.

Invisibility (no IR)

NI (No IR) Full-Color series cameras have no infrared illuminator, making them well hidden security guards in darkness. No IR also means no spider webs, no false alarms, no bloom from rain or snow.

Perimeter Protection

Full-Color series cameras (5249 / 5449) have been upgraded to AI version, now support filter for Vehicle and Human for intrusion or tripwire. Perimeter Protection reduces false alarms and decreases pixel count requirements for object detection.

People Counting

Full-Color series cameras (5249 / 5449) have been upgraded to AI version, they support people counting in 4 separate regions, which provides statistics for separate individual's entrance and exit with high accuracy.

Face Detection

Full-Color series camera (5249) now upgraded to the AI version, enabling the camera to locate faces quickly and accurately from the video source and capture facial images with 6 attributes including age / gender / glasses / emotion / beard / mask.
